FACTS AND INFORMATION *BLUE LIGHT LED*

CROP SPRAYING EQUIPMENT

The Light can be mounted on the wing-end of the spraying vehicle, close to the pivot. It will light up the whole spraying area with high illumination in a nozzle pattern.

DEER REPULSE

It was found out, that Deers and other wildlife animals are very afraid of the shine of blue light. Therefore, this LED Light offers a very simple and efficient method to repulse uninvited guests from cultivation fields.

Part No. 809061

CHICKEN FARMING

Chicken are not able to perceive blue light, so in a dark environment chicken will not realize that they will be spotted by a blue light which makes it a lot easier to handle those. It is also known that it has a soothing effect on them.
